PAUL'S SCARLET CLIMBER

THIS is the most intensely red of all Climbing Roses, with flowers of vivid scarlet which do not fade in the hot sun. The individual flowers are much larger than those of the old-fashioned ramblers and are produced profusely and continuously for almost four weeks in June and July.

The plant is very vigorous but does not grow so tall as to become unmanageable. It may be trained to a porch pillar, on a trellis, or kept tied to a post 6 to 10 feet high, which it will clothe with a flaming mantle of flowers every year, attracting the attention of everybody by its superlative brilliance and beauty.

Paul's Scarlet Climber is rated by the American Rose Society as one of the finest climbers in the United States.
